# Features of your MultiBlender Platinum

## **Ingredient cup.**

Handy 70ml ingredient cup.

## **Flexible lid with pouring hole.**

To provide the necessary safety, the lid seals tightly to the glass jug and features a pouring hole, that allows you to add ingredients during the blending process.

## **1.5 litre heat-resistant glass jug.**

The sizeable 1.5 litre glass jug features specially designed internal ribs to cycle ingredients back into the blade system for superior results.

The jug features an easy to pour lip and is marked in both cups and millilitres (ml) for ease of use. The heat-resistant glass jug is ideal for pureeing warm soups.

## **Detachable blade system assembly.**

The detachable blade assembly unit unscrews from the glass blending jug for convenient and thorough cleaning.

## **Motor base.**

The base houses a heavy-duty 650 watt motor, which provides unbeatable industrial strength performance.

## **Non-slip feet.**

Keeps the blender secure on the bench top during use.

**Serrated stainless steel six-blade system.**

Specially designed for extra durability, the heavy-duty, serrated stainless steel blade with a six-blade construction, smashes ice cubes to powder, produces a smooth consistency when pureeing and combines ingredients perfectly for a frappé.

**Pulse button.**

Increases the intensity of the standard blending action to assist in the most demanding blending tasks.

**3 speed control.**

The easy to grip control dial allows you to select one of three speeds ranging from low to high.

# Before using your MultiBlender Platinum

**Important:** Always ensure your blender is unplugged from the power outlet before fitting or removing the blade assembly. Always handle the blade assembly with caution, as the blades are extremely sharp.

**To assemble the six-blade system in the glass jug (see Figure 1).**

1. Place the silicone rubber seal over the six-blade assembly, as shown in figure 1.

Figure 1

2. Place the six-blade assembly into the glass jug and turn clockwise to secure firmly into position (see figure 2).

Figure 2

**Note:** The blender jug will leak if the six-blade system is not assembled correctly.

**Note:** Do not attempt to remove the stainless steel blades from the blade assembly.

3. Plug the power cord into a 230-240 volt power outlet and turn the power 'ON'.

# Using your MultiBlender Platinum

1. Place the blender jug onto the motor base.

**Note:** Do not switch 'ON' the MultiBlender Platinum without the lid in position.

2. Place ingredients into the glass jug. Do not exceed the maximum indicated level – 1.5 litres.

3. Position the lid with ingredient cup onto the blender jug. Ensure the lid is firmly in place.

4. Using the selector dial, select the desired blending speed 1, 2, 3 or PULSE.

Settings 1, 2, 3 will provide continuous blending until the dial is turned to the '0' position.

The Blending Guide on page 8 shows the functions that can be performed and the suggested speeds to use.

**Note:** Although the lid fits firmly to the glass jug, we advise when blending liquid ingredients, to place your hand on the lid as you initially select the blending speed/function. As the powerful 650 watt motor could cause the liquid to surge up causing leakage. Once you have started blending you can remove your hand.

**Note:** Do not operated for more than 2 minutes at a time.

Further ingredients can also be added whilst blending by removing the ingredient cup and pouring ingredients through the hole in the lid.

5. After you have completed blending, turn the control dial to the '0' position.

**Note:** When removing the six-blade assembly from the glass jug you may need to slightly tilt the blade so that it slides out easily. You shouldn't force the blades out of the glass jug as this will ultimately damage the blades.

# Features uses of the MultiBlender Platinum

## **Crushing Ice**

Simply add ice to the blender and a small quantity of water, which will aid in the crushing process. Then press the 'Pulse' function and hold for 1-2 seconds and release. Continue this process and in seconds your ice is fluffy and snow flake-like.

## **Pulse setting**

The pulse function provides short bursts of power, so that you can prepare breadcrumbs, grind chocolate, finely grind nuts and biscuits.

You can also use the Pulse function for cleaning the blender. Simply pour in some warm water and a small amount of detergent, press the 'Pulse' function for 1-2 seconds and release. Repeat 3-4 times. The unit will clean itself, without you having to handle the sharp blades. Rinse and dry, being careful as the blades are sharp.

# Handy Blending Hints

- Nothing can beat a blender for making smooth purees and sauces or for whipping up frothy drinks - from healthy breakfast shakes to frozen daiquiris.
- Use your blender for chopping small amounts of food like nuts, bread crumbs and whole spices.
- Turn any oil-based salad dressing into a creamy style dressing by blending it until slightly thickened.
- A brief whirl in the blender will rescue a lumpy gravy, or an egg-based sauce that has separated.
- Food items for blending should be cut into cubes (approximately 2-3cm), this will assist in achieving an even result.
- Ensure the lid is firmly and securely placed on the jug. Do not operate the blender without the lid on, if you wish to add any additional ingredients remove the ingredient cup and add as necessary.
- Never fill above the maximum level indicator 1.5 litres.
- To ensure efficient mixing when blending dry mixtures, it may be necessary to stop the blender and push ingredients down the sides of the jug with a spatula.
- When pureeing fruit or vegetables, cooked or raw, cut into small pieces to facilitate blending.
- When making bread crumbs, use 2 to 3 day old bread, leaving crusts on, to minimise the possibility of clumping. If only fresh bread is available, dry it out for a few minutes in a low heated oven.
- When blending a variety of ingredients together, blend the liquids first, then add dry ingredients.
- Always ensure stones are removed from fruit and bones from meat as these can harm the blades.
- Don't allow a used blender to sit for too long as the food will dry onto the blades, making it very difficult to clean. If you can't clean the blender straight away, pour some warm water in it and allow to soak.
- Do not process hot liquids in your blender. Allow to cool before processing.
- Always ventilate the blender jug when pureeing warm ingredients. This is achieved by lifting the ingredient cup out of the lid, after starting the blender.

# Care and Cleaning

## Quick cleaning method.

Half fill the blender with warm water and a small amount of detergent. Press the 'Pulse' function and hold for 1-2 seconds and release. Repeat 3-4 times. Then remove the jug and rinse it under running water.

## For thorough cleaning.

Unscrew the six-blade assembly from the glass jug by turning the bottom of the blade assembly in an anti-clockwise direction (see Figure 3).

Figure 3

Remove the rubber seal from the blade assembly. Wash the blender lid, ingredient cup, rubber seal, blade assembly and blender jug in warm soapy water.

**Caution:** Take care when cleaning the blades as they are extremely sharp.

**Note:** Do not clean any part of the blender in the dishwasher.

## To clean the motor base.

Use a damp, soft sponge with mild detergent and wipe over the motor base.

**Note:** Never immerse the motor base in water.

# Recipes – Thick Shakes

## Tips for great Thick shakes

- Don't use hard ice cream straight from the freezer
- Leave ice cream out for about 5 minutes before blending; this time may vary depending on how cold your freezer is.
- Ice creams with a higher cream content may need a little extra milk.
- Always put ice cream in the blender jug in small pieces, never in large chunks as this may prevent the blender from blending in the allotted time.
